"We aim for succes"

QTOUR presents the Norwegian 1 vs.1 Championship

ASUS, Sennheiser, Logitech, NextGenTel, Gamelio, Electronic Arts and Samsung are proud to present QTOUR Norwegian 1 vs 1 Championship at The Gathering the 4th to 8th of April! The best Counterstrike players in Norway will compete on the legendary QTOUR stage, visited by some of the best gamers in the world! With the new format, a new map and a fresh start of the competitive gaming year of 2007, we aim for success!

We learn from the community!

3 years has gone by since the first QTOUR was announced and we have improved the event ever since then. Minor and major changes have been made through the years, all due to voices from the community, players, managers, partners and our own experience.

The new format!

With past experience from the QTOUR Championship at NetOnNet in Malmö 2006, QTOUR 2007 will use the same tournament structure with a single elimination bracket. 14 players will be invited from the country where the QTOUR Championship is held and a pre qualify will resolve into the final 16 players for the final tournament. The 16 players will play in a single elimination bracket best out of 3 round and first to 20 wins the round. Players are allowed to use their own mouse, keyboard and mouse pad.

QTOUR Norwegian Championship

The QTOUR Norwegian Championship will take place at The Gathering 2007 between 4th to 8th of April. On the 6th of April a pre qualify will be held on the QTOUR stage to announce 2 qualified players to the final day. The finals will be played the 7th of April on QTOUR main stage. Signups to the pre qualify are happily received at our desk during the 4th and 5th of April. You will find us next to the WCG area.

Who is the best individual player in Norway? Stay tuned... That's what we are going to find out.

EVENT ORGANISER QPAD:

QPAD built its success on a grassroots commitment to the gaming community. Like you, we thrive in the madness of competition and embrace the free spirit of gaming. Our sponsorship of the Q Tour, events, communities, cups, tournaments, teams and LAN parties reflects this commitment. The knowledge we've gained has fed into our development of high quality products that have a great performance and given many a winning edge.
